

New common certificates and product names

- marine insulation worldwide

Worldwide harmonization
of Approvals and Products

Your Marine & Offshore partner worldwide

Trough the past years, the ROCKWOOL Group has increased the effort within Marine & Offshore by establishing a particular international organisation focusing on this exact area. ROCKWOOL Marine & Offshore coordinates common international activities as e.g. product development, approvals and marketing. This takes place in cooperation with the local ROCKWOOL companies and dealers, who are responsible for the daily sales work and the local contact to customers.

The aim is to be able to offer competitive solutions and to be the natural choice as your preferred business partner worldwide - both now and in the future.

Common International Certificates and Product names

In order to increase the transparency and adapt to the increasing internationalization ROCKWOOL Marine & Offshore introduces a series of common certificates and product names.

Certificates

The common certificates are according to EC Council Directive 96/98/EC as amended – Marine Equipment Directive; the so-called MED certificates. The new certificates ensure an easy access to our products, constructions and approvals used daily worldwide. The certificates give the needed overview in a clear way and ensure a uniform approach to our international customers.

Product range and product names

In connection with the new certificates, the product range and product names have been harmonized.

The common product names will ensure easier and more transparent work across borders and from project work to the final execution.

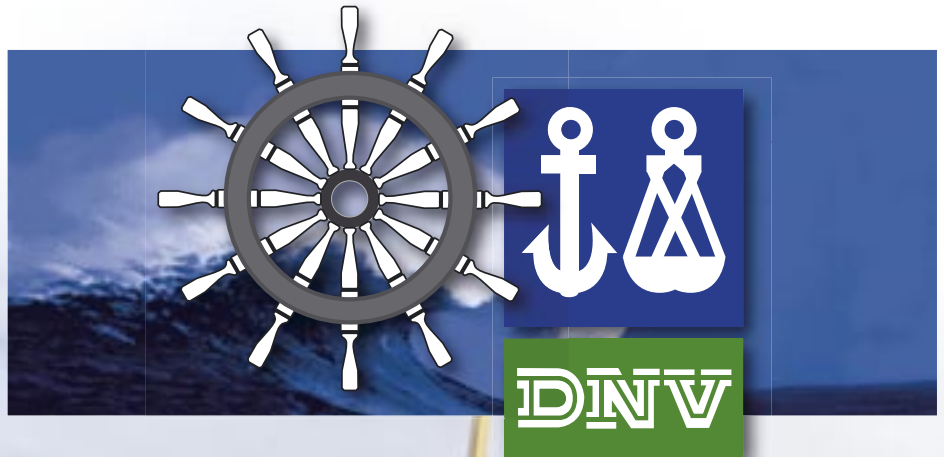

Common MED certificates issued by Det Norske Veritas

The new certificates cover our local production facilities and ensure a common production standard and thereby guarantee a uniform product quality. At the same time, the common certificates ensure an easy and clear overview of both common international approvals and local approvals. The new certificates will apart from meeting the European demands with MED approvals, also meet the strict demands from the US under USCG. Demands which are also applying in a big part of the rest of the world.

“Det Norske Veritas” is the notified body for our MED certificates.

Type approvals continue unchanged

Other certificates from the local naval authorities or classification societies, Type approvals from i.e. Lloyd's register, American Bureau of Shipping continue unchanged and are still valid.

Common product range and constructions

Rockwool Marine Batts 27-55
Rockwool Marine Slab 55-300
Rockwool Marine Firebatts 100-150
Rockwool Marine Lamella Mat 32-45
Rockwool Marine Wired Mat 35-150
Rockwool Pipe Sections

6 product certificates

In connection with the new certificates, a harmonisation of our international product range and product names will take place. It will make it easier for you to ensure the right material in your own country and for your international projects across borders.

In line with our international name structure, the approved products will be divided in 6 main non-combustible product certificates.

International products for international projects

In practice, the new certificates mean that known names as Rockwool Marine Firebatts 130 or Rockwool Marine Wired Mat 90 will have a clearly defined, common meaning and product quality in the future no matter which company within the ROCKWOOL Group the product comes from.

Apart from the international product names, marine products will still be marketed under local names in some countries. These product names will also be covered by the common certificates and appear in these.

A-15 Bulkhead Steel
A-15 Deck Steel
B-15 Bulkhead Steel Extension
A-30 Bulkhead Steel
A-30 Deck Steel
A-30 Deck Aluminium
A-60 Bulkhead Steel
A-60 Bulkhead Aluminium
A-60 Deck Steel
A-60 Deck Aluminium

10 construction certificates

International constructions

The common certification and new MED certificates also mean a common range of constructions, which can be used in connection with international projects. It will ease the work in international projects when the same construction can be recognised through the entire project no matter where the work takes place.

To simplify the overview of our certificates, constructions have been put into main groups on each certificate. There will be 10 construction certificates which cover the entire area within MED. As for the names, it concerns a range of international constructions. Additionally, local approvals will be marketed in specific countries. These constructions will also enter into the common certificates.

The new certificates

The new certificates involve a new and clearer structure.
The essential characteristics are illustrated below.

Construction certificates

- Every certificate is issued to ROCKWOOL Marine & Offshore, Hedehusene Denmark
- Every certificate is issued under the common identification under Det Norske Veritas 0575/xx
- Construction certificates are divided in specific main groups stated on page 5 e.g. A-60 Bulkhead Steel
- In every certificate, the constructions are divided into main groups, international certificates marketed worldwide and local certificates only marketed in specific countries
- Every construction has been given a unique number which ease the identification and traceability in the project work

**Product certificates
(non combustible)**

- The certificates follow the specific product group shown in page 5. On the first page of the certificates, the international product terminology is mentioned, e.g. Rockwool Marine Firebatts 100-150
- On page 2, the local product names will appear

**Quality system certificates
(D-certificates)**

- Every D certificate will follow the specific main area, non-combustible, low flame spread and constructions, as every area will be covered by its certificate
- The D certificates will name the respective ROCKWOOL production sites covered by the common MED certification
- The number for the common USCG certification will also be at the D certificates as will the product identification for MED-certification
